Why the Chartered Company?

- **The under-appreciated Engine of Innovation and Production**
 - Share Issuance
- **Legal**
 - Refer to presentation by Peter from Coin Center
- **Best use-case for Ethereum Smart Contracts**
 - Legal Engineering / Crypto-Legal Substitution
 - New type of automation in legal process flow
 - Revolutionize a traditional business model

Why the Chartered Company?

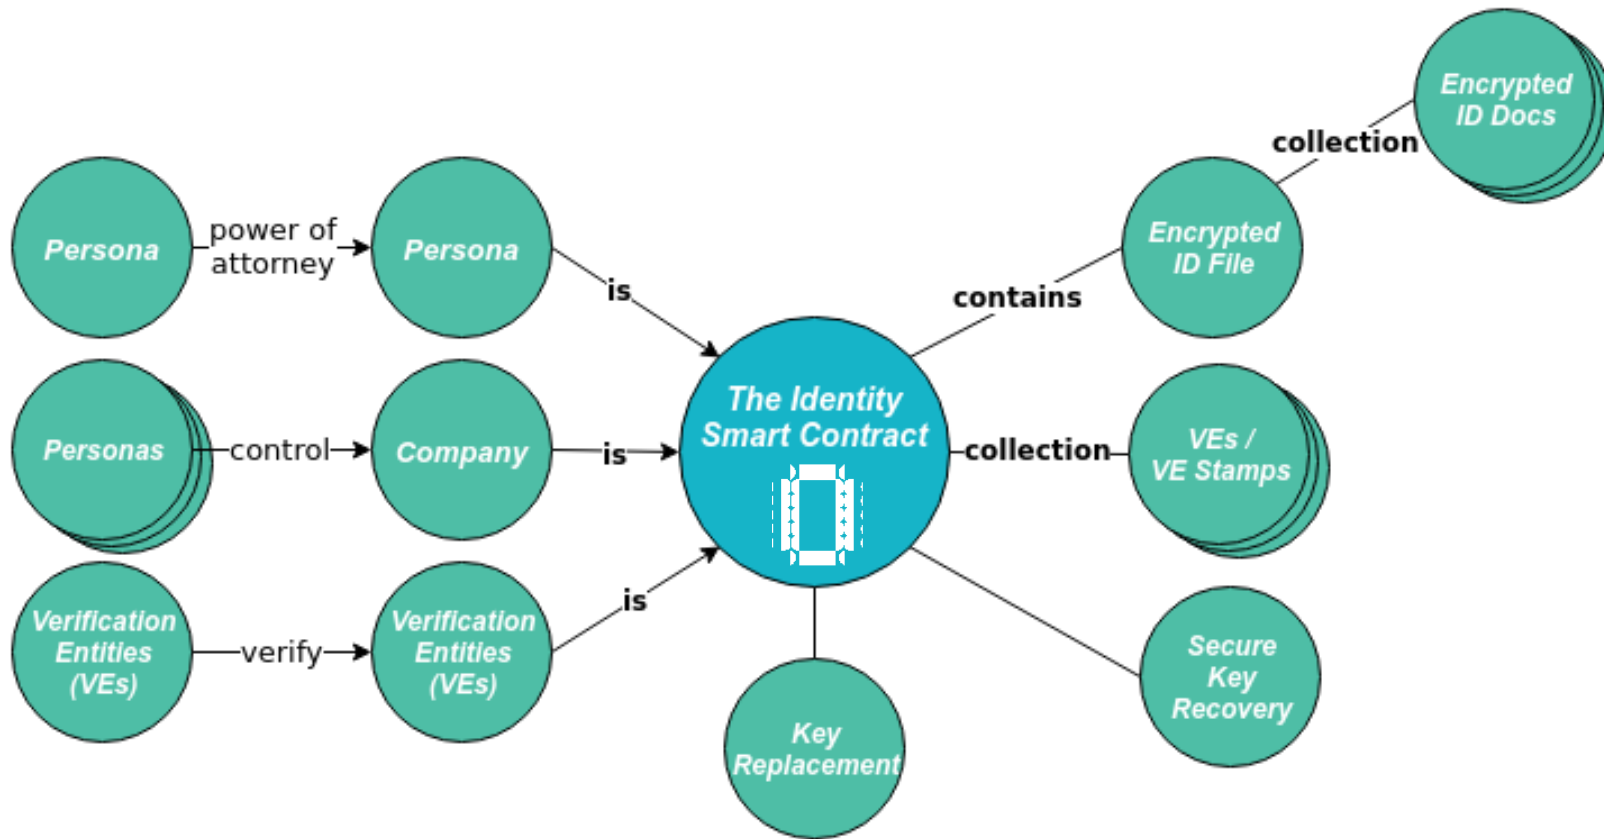

- **Best Practice Solution for getting Organized**

→ Secure-By-Design after many years of evolution

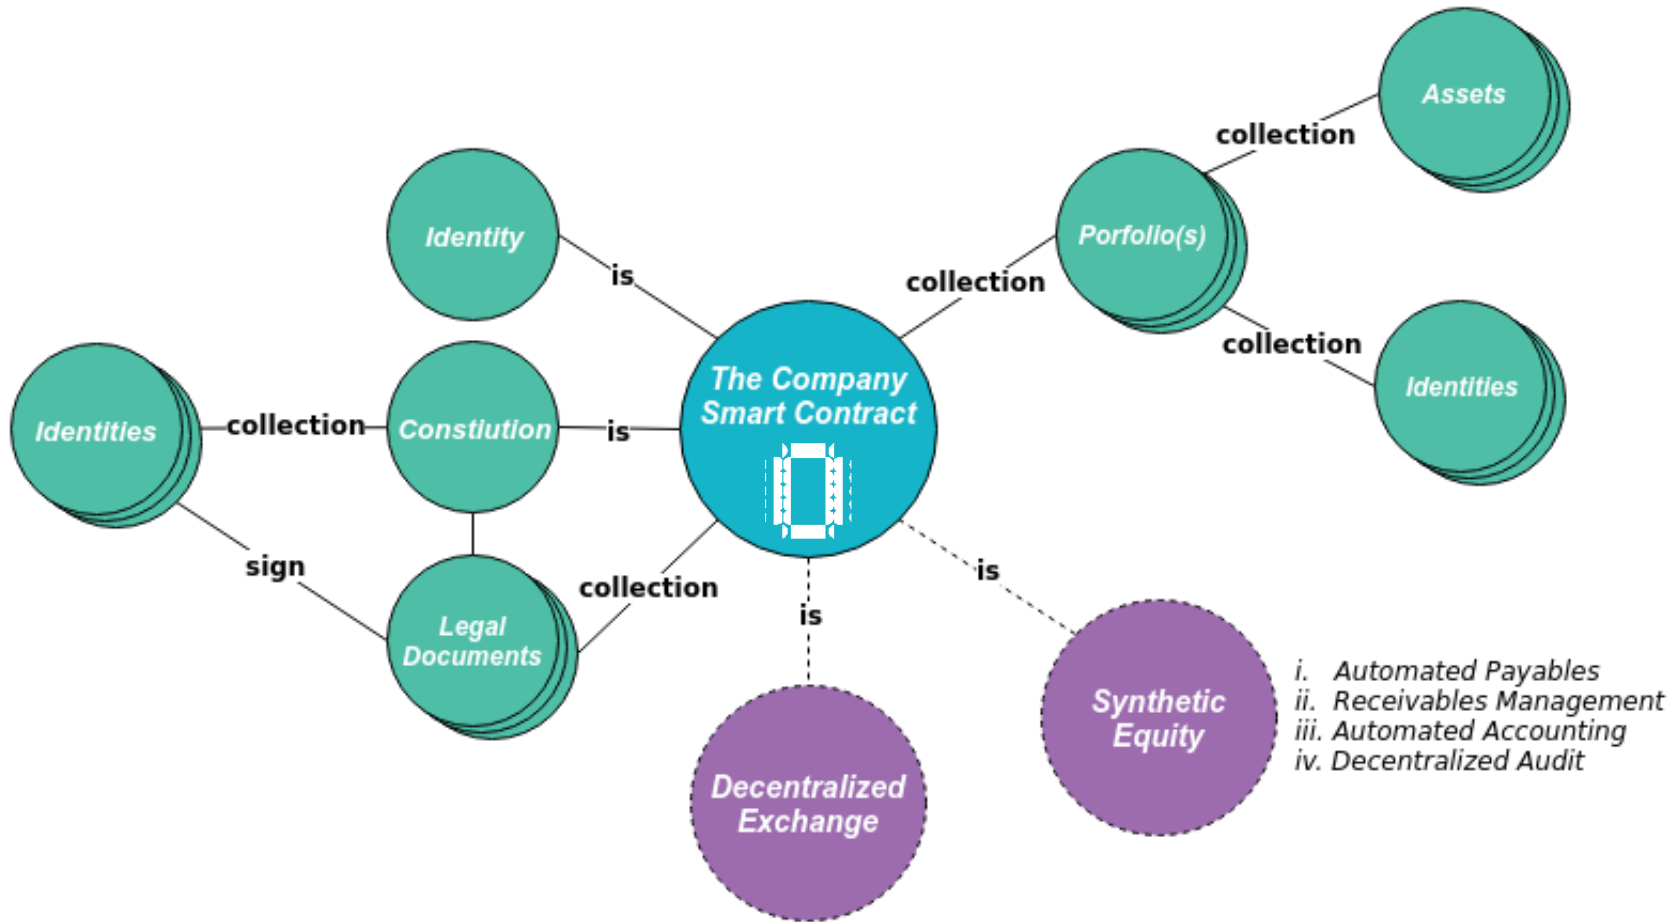

The Identity Smart Contract

- *Identity = Document Signer + Asset Holder + Decentralized Verification*

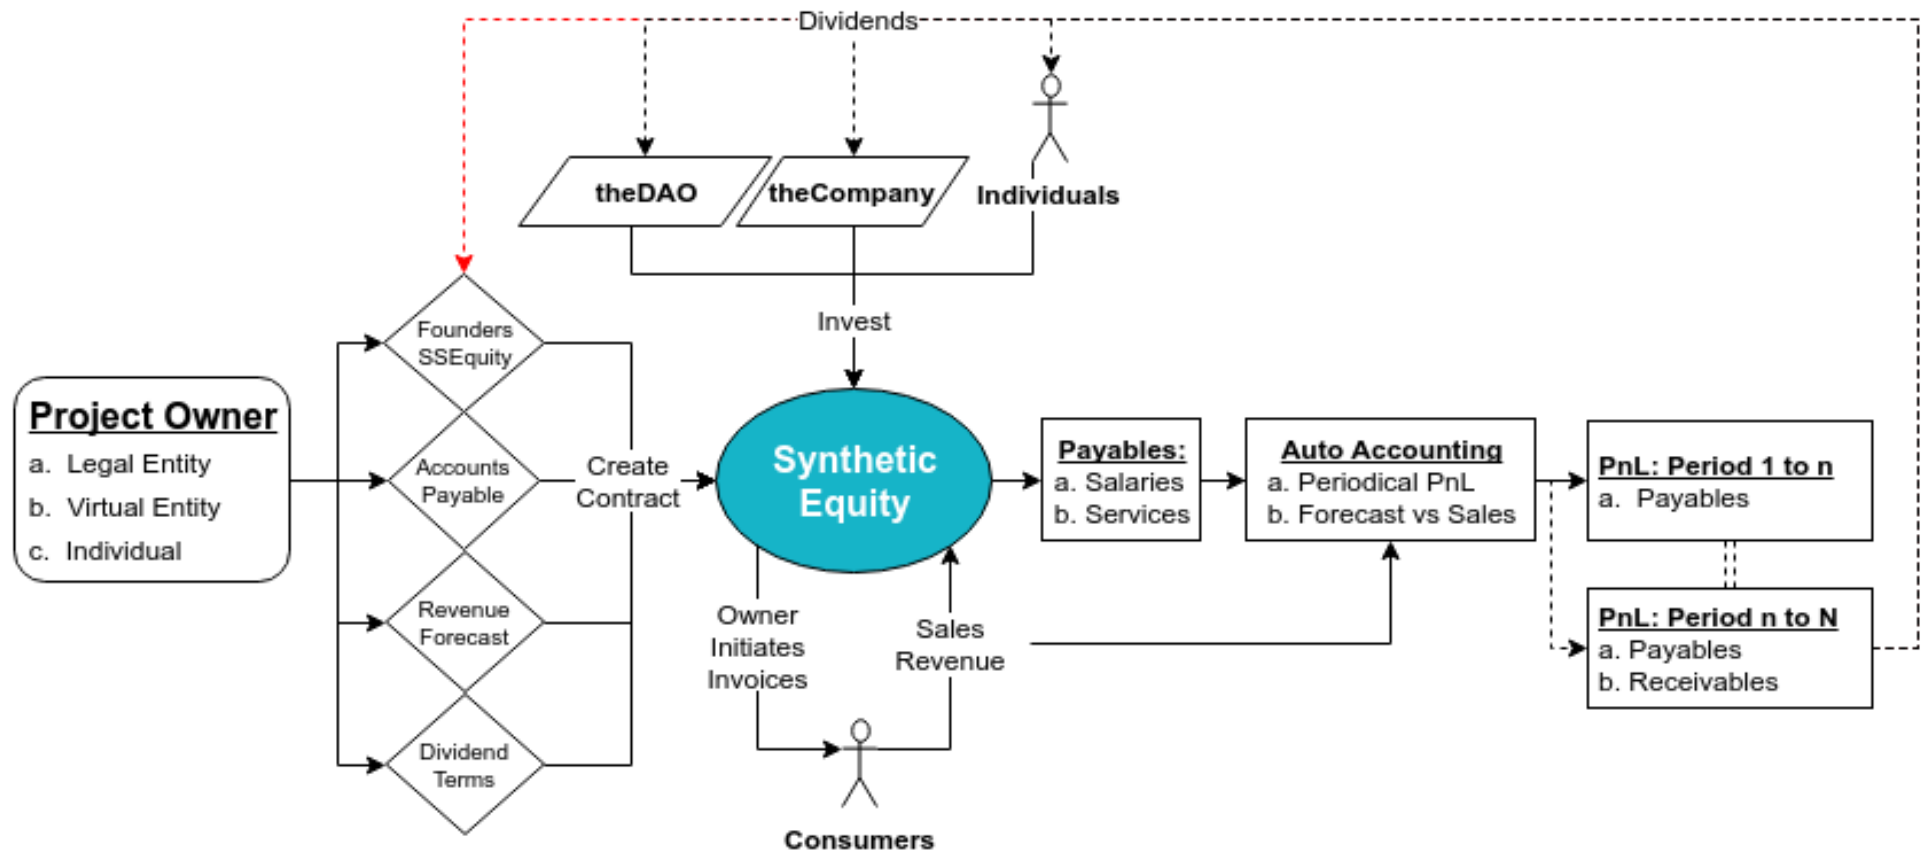

The Company Smart Contract

- *The Future Engine of Organizations that would drive Innovation*

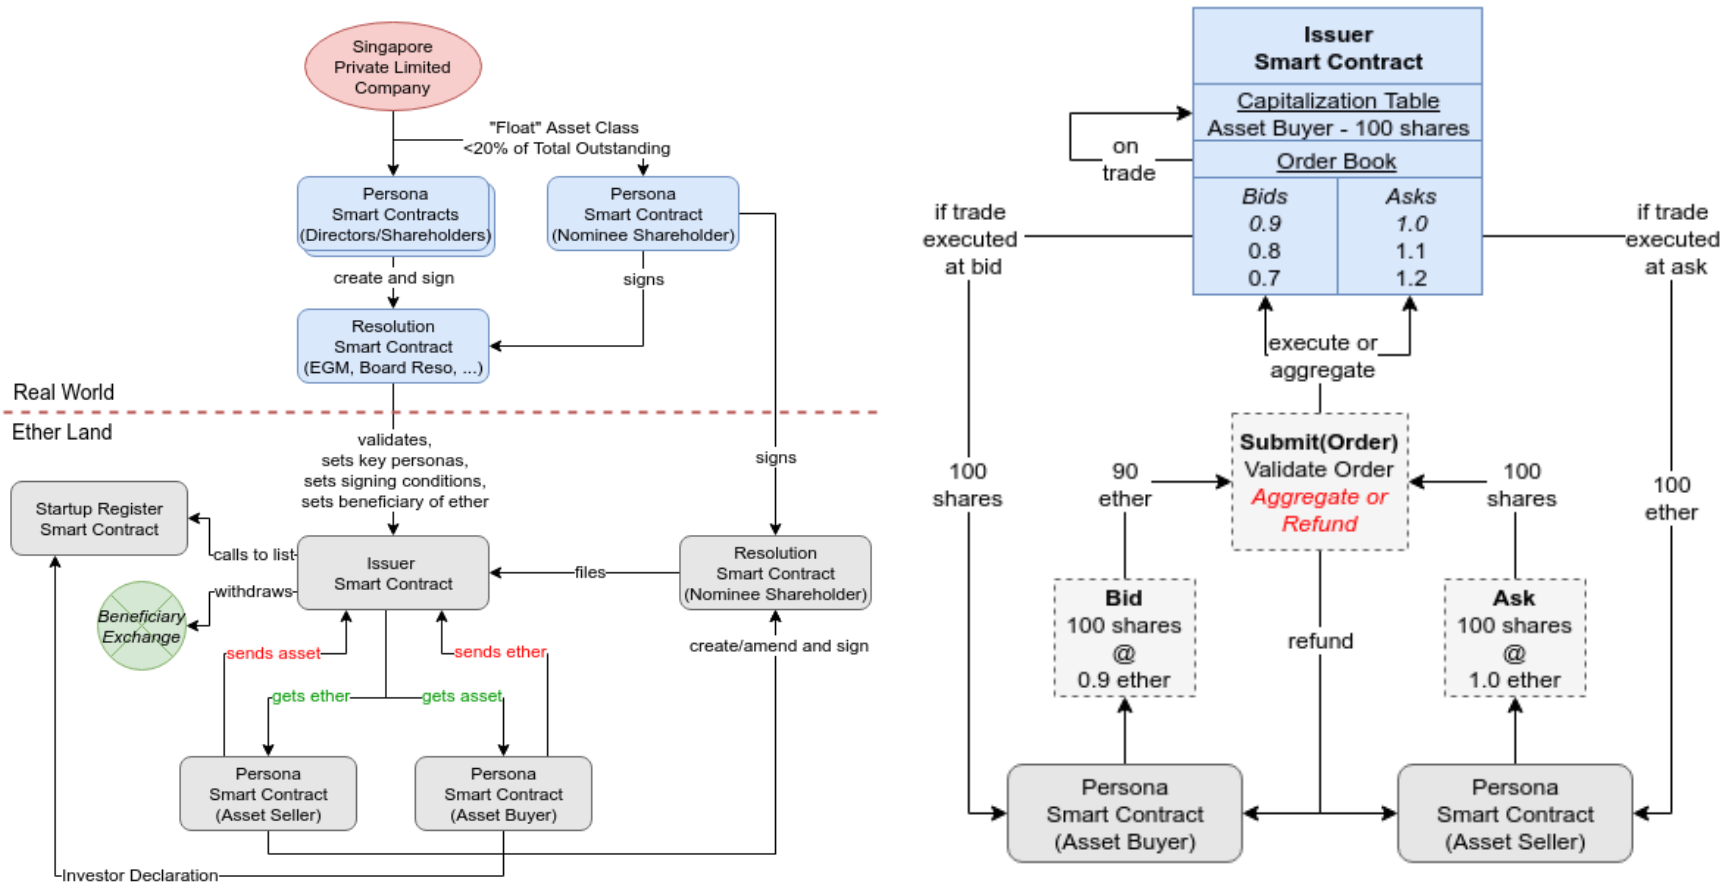

The Synthetic Equity Smart Contract

- *Replicating the payoff structure of traditional equity via automation of start-up finance.*

Company as a Decentralized Exchange

- Each Company Smart Contract inherits from a Decentralized Exchange Smart Contract with some classic exchange features.
